The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply										
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).										
Status										
 1) Responsive to communication(s) filed on 21 November 2005. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Applicant's election of Species 1 and subspecies 11 claims 1-4, 7-10, and 12-20, in the reply filed on 11/21/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Therefore claims 5, 6, and 11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-10 and 12-14 rejected under 35 U.S.C. 102(b) as being anticipated by (USPN 6,228,062) Howell et al.

Howell discloses the same invention as claimed being a torque device comprising a guidewire (24), a split seam sheath (36), handle (32) with a lumen (60) extending there through, a side-port (46) to remove the sheath from the guidewire, an extension arm (10) having an a tubular extension (shown near the reference character 58 in figure 5) and an opening for receiving both the guidewire and sheath.

Application/Control Number: 10/675,611

Art Unit: 3738

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4, 7, and 15-20 are rejected under 35 U.S.C. 103 as being unpatentable over (FPD FR 2580504) Pieronne in view of (USPN 6,228,062) Howell et al.

Pieronne discloses the invention substantially as claimed being an embolic filtering system comprising an expandable filter frame (1), a filter element (11), a split seam sheath (16), and a torque device (19). However, Pieronne does not disclose all the structural elements of the torque device.

Howell teaches the use of a locking torque device comprising a guidewire (24), a split seam sheath (36), handle (32) with a lumen (60) extending there through, a funnel shaped side-port (46 shown in figure 5) to remove the sheath from the guidewire, a locking mechanism (comprising elements 50 and 52), an extension arm (10) having an a tubular extension (shown near the reference character 58 in figure 5) and an opening for receiving both the guidewire and sheath, and a member (34) for preventing kinking of the guidewire in the same field of endeavor for the purpose of providing the user with enhanced ability to lock and maneuver the sheath and guidewire.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the torque member as taught by Howell with the

Application/Control Number: 10/675,611

Art Unit: 3738

embolic filtering system of Pieronne in order to provide the operator better control of the

Page 4

sheath during its separation from the guidewire.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Christopher D. Prone whose telephone number is (571)

272-6085. The examiner can normally be reached on Monday Through Fri 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Corrine McDermott can be reached on (571) 272-4754. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
